

# Here's what natural gas pipelines really look like!

*A 42-inch pipeline being built in Pennsylvania*

*Pipeline construction through relatively flat terrain (left); Appomattox pipeline explosion in 2008.*

**Here are just a few reasons why our community is UNITED against the proposed route of a 42-inch natural gas pipeline through Augusta County:**

- **Our KARST Geology (Sinkholes eat Pipelines!)**
- **Our Precious Drinking Water (not only for us, but for millions of people downstream)**
- **Our Family Farms & National Forests**
- **Our Community's Safety**
- **Our Property Rights & Property Values**
- **Our Agricultural & Tourism Economy**

*Our UNITED AUGUSTA COUNTY COMMUNITY looks forward to continuing the conversation about the proposed natural gas pipeline route at the Dominion Open House meeting on Monday, September 15, 5-8 p.m. in Verona at the Augusta County Government Center.*
