Kimberly Bose, Secretary
Federal Energy Regulatory Commission
888 First Street, NE, Room 1A
Washington, D.C. 20426

Dear Ms. Bose:

I am contacting you on behalf of my constituent, The Augusta County Service Authority, to seek a meeting with FERC representatives and Tracy C. Pyles, Jr., Chairman of the Augusta County Service Authority along with other Service Authority Board Members. Mr. Pyles sent you a letter dated April 27, 2015, expressing their concerns and requesting to meet with a FERC representative. To date no such meeting has been scheduled.

The Service Authority is responsible for public water production, public sewer and collection and treatment, as well as for the operation of Augusta County's solid waste disposal facility. The route of the Atlantic Coast Pipeline (ACP) by Dominion Transmission, Inc. (DTI) is of grave concern to the Service Authority because to date they have not been given forthright answers to their questions or been given the opportunity for a meaningful discussion with your agency or Dominion.

Considering the Service Authority is responsible for water sources and its infrastructure for the second largest county in Virginia which may be threatened by the ACP project, I believe it is of utmost importance for FERC to meet with the Service Authority Board to fully explore and answer their questions. I also support their request to be a Cooperating Agency in the FERC process.

Please give this request serious consideration and act quickly to address their concerns. If I can be of assistance to you, please do not hesitate to contact me.

Sincerely,

Steve Landes
